Key TurboCoder features:

- **Coding Rules** are now enhanced with individual indexing to improve navigation, searching and browsing.
- **OFF-LINE** – You **DON'T** need web access when you code – so you always have an immediate response
- **One click coding** – one step from Index to Tabular
- **Find what you need** easily and quickly – **GUARANTEED**
- **Turbosearch** – provides an autocomplete facility after you key in just three characters and corrects misspelled terms
- **Complete off-line replacement for the books**
- Built with over a decade of **experience** using ICD-10-AM and ACHI Coding in conjunction with **Clinical coders**
- **MultiView** – view up to four volumes on-screen at the same time.
- **Drag-and-Drop** codes into reports
 - Build your own code history
 - Export to PAS systems
 - Retain format for coding reports
- **AVAILABLE** in single user and customised network licensing
- **NO RISK** – **5/20/30 Guarantee**
 - guaranteed to enable you to code more than **5X** faster than books
 - guaranteed to be more than **20%** cheaper than the books
 - **30** day money back guarantee

Additional windows features:

- **User Notes** provide a powerful and easy-to-use facility to share notes with other users using e-mail or LAN

TurboCoder – Fast, Affordable and Easy-to-Use

TurboCoder has the same look and feel of the ICD-10-AM, ACHI and ACS coding books you've always used, but with all the power and speed of the revolutionary eComPress technology. The TurboCoder advantages:

Easy-to-use

Intuitive browser is easy to install and to use, and requires no special training.

Search results are displayed in context, and the navigation pane is synchronised with the content to ensure you are never lost and always know precisely where you are in the classifications.

Comfort

Customise the text and screen panels to suit your personal viewing requirement. Search and view multiple publications simultaneously with the customisable MultiView screens.

Smart table headings ensure the headings remain at the top of long tables like Neoplasms, when you scroll, to provide unambiguous access to column information.

Confidence

All content is exactly the same as published by the Australian Consortium for Classification Development (ACCD), and includes authorised Errata and Coding Rules. TurboCoder content is uniquely encoded, so it is always authentic and secure.

Web independent

TurboCoder downloads fast for instant off-line access – so you don't have to rely on web connections while you code.

One-click coding

All codes are hyperlinked and indexed. One mouse click takes you from the Index to the Tabular. One click takes you to the Australian Coding Standards and Coding Rules.

Searching and spelling

TurboCoder has Pre-emptive Search Spelling Help (PSSH). PSSH provides an autocomplete pull-down list of suggested words after three or more characters are keyed, and will find the medical term even if it is misspelled.

Speed and accuracy

TurboCoder is FAST and allows you to code more than five times faster and more accurately than using printed books. Even downloading and installing TurboCoder is FAST and easy because it is permanently compressed to less than one tenth the size – just follow the on screen prompts and start coding!

Annotation

User Notes give you the ability to attach your own notes with text, documents and images, web and e-mail addresses anywhere in the classification.

Share and receive Notes with fellow TurboCoder users using email or LAN. Notes always appear where you placed them, and are never lost and automatically transcribe in context to new editions.

Print or Drag-and-drop text from TurboCoder into Word and other Windows applications with all formatting preserved.

Who is EIS?

TurboCoder uses the award winning eComPress® secure compressed off-line downloadable technology with a revolutionary search engine developed by Eurofield Information Solutions (EIS). EIS is an innovative Software Development company that specialises in digital reference publishing software and health classifications. EIS originally developed TurboCoder in consultation with Clinicians, Clinical Coders and Health Information Managers.

Find out more

TurboCoder is the ideal coding reference tool. Available for your choice of coding device – Windows, iPhone and iPad or Android devices. Now you can address all of your coding needs with ease and confidence.

Visit www.TurboCoder.com.au and try it for yourself.

We guarantee that when it comes to disease and procedure coding, TurboCoder gives you the savings and productivity advantage you need to code medical records faster and more accurately.
