

NEW Secure Compressed OFF-LINE Downloadable Technology with Revolutionary Search Engine

ICD-10-AM/ACHI/ACS

The International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification • Australian Classification of Health Interventions • Australian Coding Standards

- **ICD-10-AM**
Index and Tabular
- **ACHI**
Index and Tabular
- **ACS**
Australian Coding Standards
- **Coding Rules**

TurboCoder™ – the foremost ICD-10-AM/ACHI/ACS digital clinical coding reference tool for health classification in Australia, New Zealand, Ireland and Saudi Arabia. TurboCoder utilises powerful, proven eComPress technology that's easy-to-use. It will enable you to code medical records faster and more accurately than ever before.

TurboCoder is the most cost effective and practical coding solution to meet the demands of efficient, accurate medical record coding. Its unique look and feel is reminiscent of printed coding books that most Clinical Coders learned to code with, but wrapped in an Award Winning software solution that is elegant, powerful and easy-to-use.

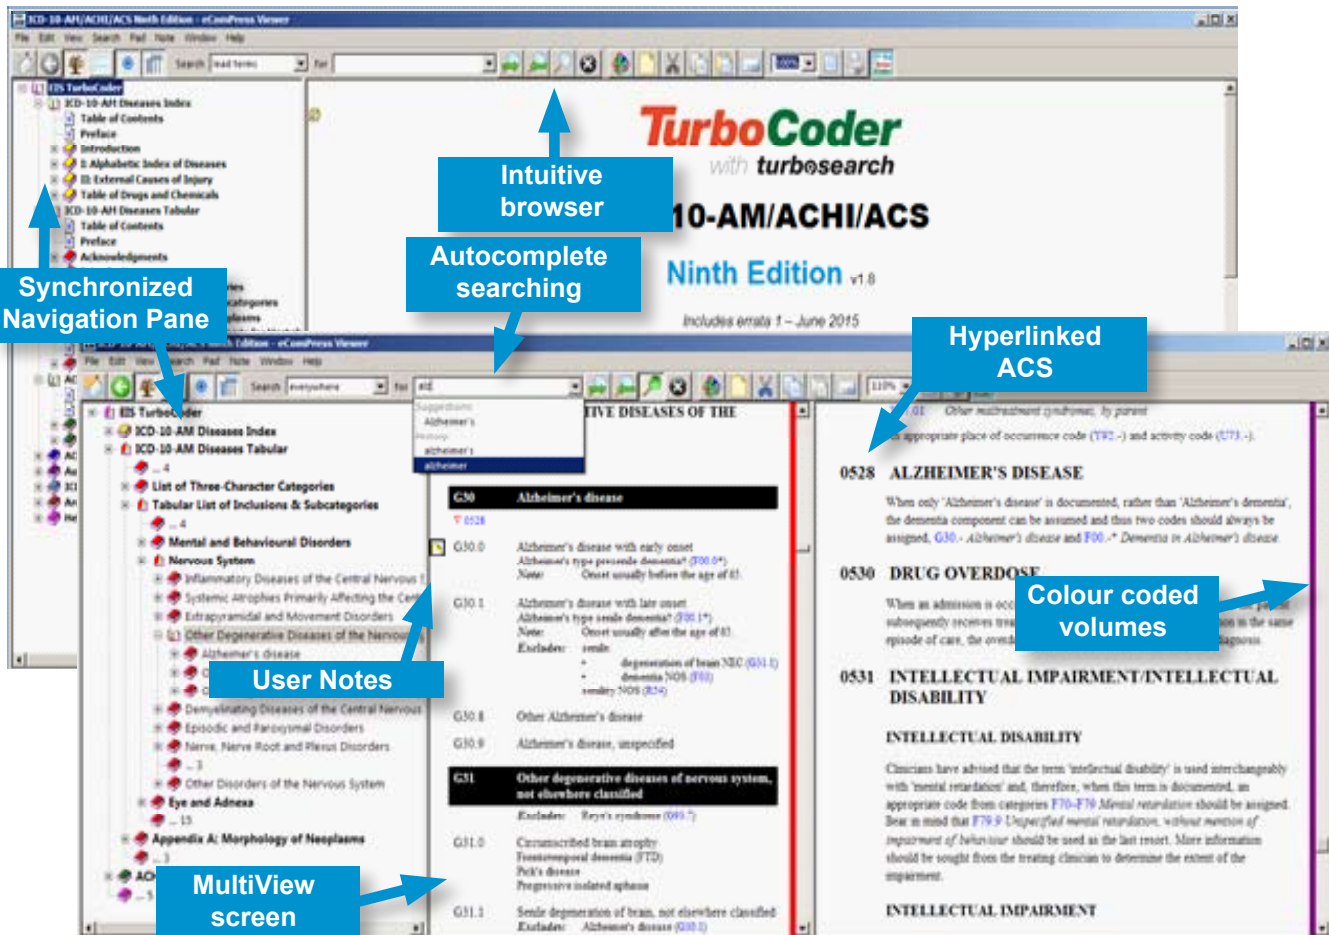

TurboCoder now features the newly developed turbosearch. Turbosearch includes the Pre-emptive Search Spelling Help (PSSH) and provides a wholly integrated spelling and autocomplete feature that gives coders the power of one-click coding. The PSSH assists in coding detailed and

complex medical separations much faster and more accurately which cannot be overstated when hospital funding is reliant on it.

TurboCoder is the foremost ICD-10 digital reference tool used by the World Health Organization, and Clinical Coders, Health Information Managers, Clinicians and Health Researchers in Australia and internationally for more than 15 years.

Improve your productivity by more than 500%

Actual TurboCoder screen images

Key TurboCoder features:

- **OFF-LINE** – You **DON'T** need web access when you code – so you always have an immediate response
- **One click coding** – one click from Index to Tabular
- **Find what you need** easily and quickly – **GUARANTEED** – and see it in context just like the books
- **Turbosearch** – provides an autocomplete facility after you key in just three characters and corrects misspelled terms
- **MultiView** – view up to four volumes on-screen at the same time.
- **Drag-and-Drop** codes into reports
 - Build your own code history
 - Export to PAS systems
 - Retain format for coding reports
- All the necessary digital reference materials for a clinical coder to code medical records, that is fast and easy to use with the same look and feel as the books – **complete off-line replacement for the books**
- Designed in conjunction with **Clinical coders**
- User Notes provides a powerful and easy-to-use facility to share notes with other users using e-mail or LAN, and **Collaborate in Context**
- Built with over a decade of **experience** using ICD-10-AM and ACHI Coding.
- **NO RISK – 5/20/30 Guarantee**
 - guaranteed to enable you to code more than **5X** faster than books
 - guaranteed to be more than **20%** cheaper than the books
 - **30** day money back guarantee
- **NOW AVAILABLE** in single user and customized network licensing

TurboCoder
with turbosearch

Your complete coding reference

Code *FASTER* and more accurately

The TurboCoder advantage

TurboCoder has the same look and feel of the medical coding books you've always used, but with all the power and speed of the revolutionary eComPress technology. We all love books, but books are inefficient, detrimental to productivity, too hard to store, search and keep up-to-date for large reference works like ICD-10-AM, ACHI and the ACS.

Easy-to-use

Intuitive browser is easy to install and to use, and requires no special training.

Search results are displayed in context, and the navigation pane is synchronised with the content to ensure you are never lost and always know precisely where you are in the classifications.

Comfort

Customise to suit your personal viewing requirements. Search and view multiple publications simultaneously with the customisable MultiView screens.

Smart table headings ensure the headings remain at the top of long tables like Neoplasms, when you scroll, to provide unambiguous access to column information.

Confidence

All content is exactly the same as published by the Australian Consortium for Classification Development (ACCD), and includes authorised Errata and Coding Rules. TurboCoder content is uniquely encoded, so it is always authentic and secure.

Web independent

TurboCoder downloads fast for instant off-line access – **so you don't have to rely on web connections while you code.**

One-click coding

All codes are hyperlinked and indexed. One mouse click takes you from the Index to the Tabular. One click takes you to the Australian Coding Standards and Coding Rules.

Searching and spelling

TurboCoder has Pre-emptive Search Spelling Help (PSSH). PSSH provides an autocomplete pull-down list of suggested words after three or more characters are keyed, and will find the medical term even if it is misspelled.

Speed and accuracy

TurboCoder is *FAST* and allows you to code more than five times faster and more accurately

than using printed books. Even downloading and installing TurboCoder is *FAST* and easy because it is permanently compressed to less than one tenth the size – just follow the on screen prompts and start coding!

Annotation

User Notes give you the ability to attach your own notes with text, documents and images, web and e-mail addresses anywhere in the classification. Share and receive Notes with fellow TurboCoder users using email or LAN. Notes always appear where you placed them, and are never lost and automatically transcribe in context to new editions.

Print or Drag-and-drop text from TurboCoder into Word and other Windows applications with all formatting preserved.

Who is EIS?

TurboCoder uses the award winning eComPress® secure compressed off-line downloadable technology with a revolutionary search engine developed by Eurofield Information Solutions (EIS). EIS is an innovative Software Development company that specialises in digital reference publishing software and health classifications. EIS originally developed TurboCoder in consultation with Clinicians, Clinical Coders and Health Information Managers.

Find out more

TurboCoder is the ideal coding reference tool. Now you can address all of your coding needs with ease and confidence.

Visit www.TurboCoder.com.au and try it for yourself.

We guarantee that when it comes to disease and procedure coding, TurboCoder gives you the savings and productivity advantage you need to code medical records faster and more accurately.
